

Software Installation

BLG413E – System Programming, Practice Session
1

Different Ways of Installing Linux

Installing on hard drive:

- Linux distribution is installed on PC's harddisk.
- High performance usage.
- Installation alongside with another Operating System (such as Windows).
 - <https://help.ubuntu.com/community/WindowsDualBoot>

Different Ways of Installing Linux

Installing on a usb flash drive:

- Linux distribution is installed on a usb flash drive using a tool such as Universal USB installer
 - <http://www.pendrivelinux.com/universal-usb-installer-easy-as-1-2-3/>

Different Ways of Installing Linux

- **Installing on a virtual machine:**

- Linux distribution is installed on a virtual machine in another Operating System (such as Windows).
- Virtualization tools such as VirtualBox are used for this purpose.

Operating System Used in This Course

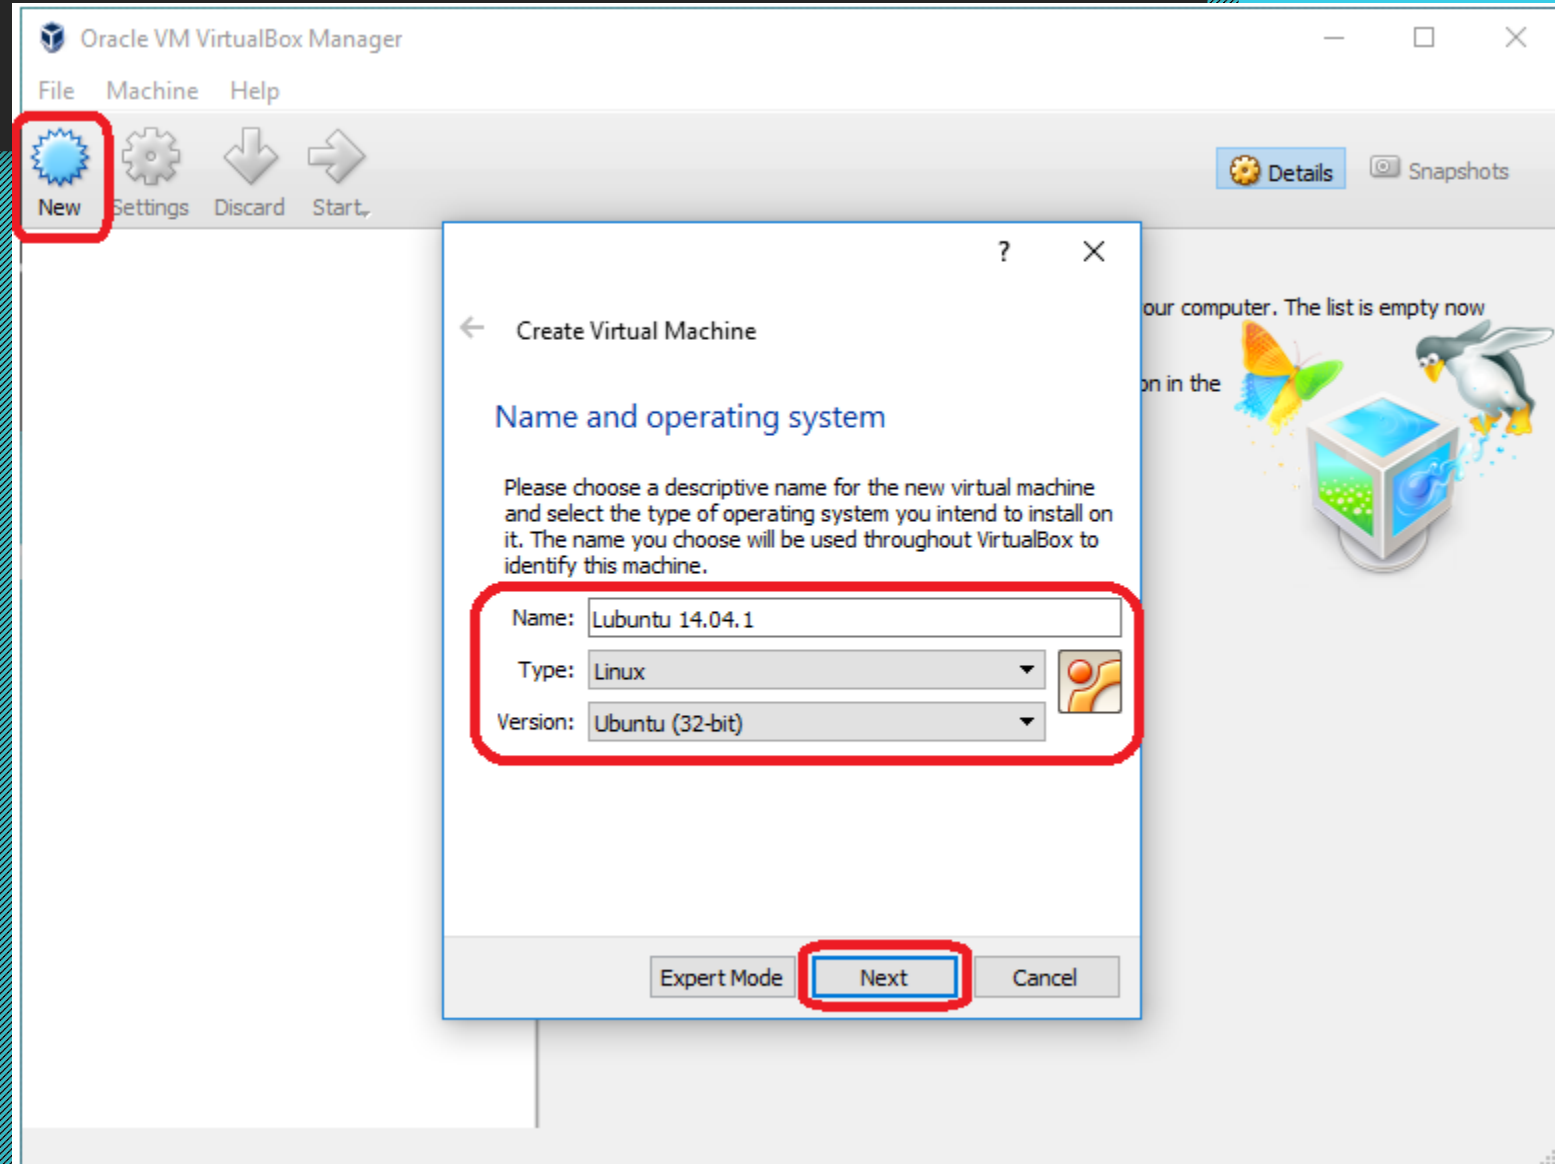

- Course material was tested on Ubuntu 14.04.5 LTS “Trusty Tahr” release, 32 bit version. Although most of the practical information in the material can be applied to any Ubuntu-based system, you might encounter problems when working on a different version.

Installing Lubuntu using VirtualBox

1. Download and install VirtualBox compatible with the operating system you use (Windows, Mac OS etc.):
 - <https://www.virtualbox.org/wiki/Downloads>
2. Download Lubuntu 14.04.1 LTS (Trusty Tahr) 32-bit PC (i386) desktop image:
 - <http://linux.psu.ru/lubuntu-releases/14.04/release/lubuntu-14.04.1-desktop-i386.iso>

The screenshot shows the 'Install' window titled 'Who are you?'. It contains several input fields and checkboxes. The 'Your name' field is filled with 'itucs' and has a checkmark. The 'Your computer's name' field is filled with 'itucs-VirtualBox' and has a checkmark. Below it, a note says 'The name it uses when it talks to other computers.' The 'Pick a username' field is filled with 'itucs' and has a checkmark. The 'Choose a password' field is filled with six dots and has a red warning 'Short password'. The 'Confirm your password' field is also filled with six dots and has a checkmark. There are three radio buttons: 'Log in automatically' (unselected), 'Require my password to log in' (selected), and 'Encrypt my home folder' (unselected). At the bottom right, there are two buttons: '< Back' and 'Continue'. The 'Continue' button is highlighted with a red rectangle. At the very bottom, there is a progress bar with seven dots, the fourth of which is filled.

Install

Who are you?

Your name: ✓

Your computer's name: ✓
The name it uses when it talks to other computers.

Pick a username: ✓

Choose a password: Short password

Confirm your password: ✓

☐ Log in automatically
☒ Require my password to log in
☐ Encrypt my home folder

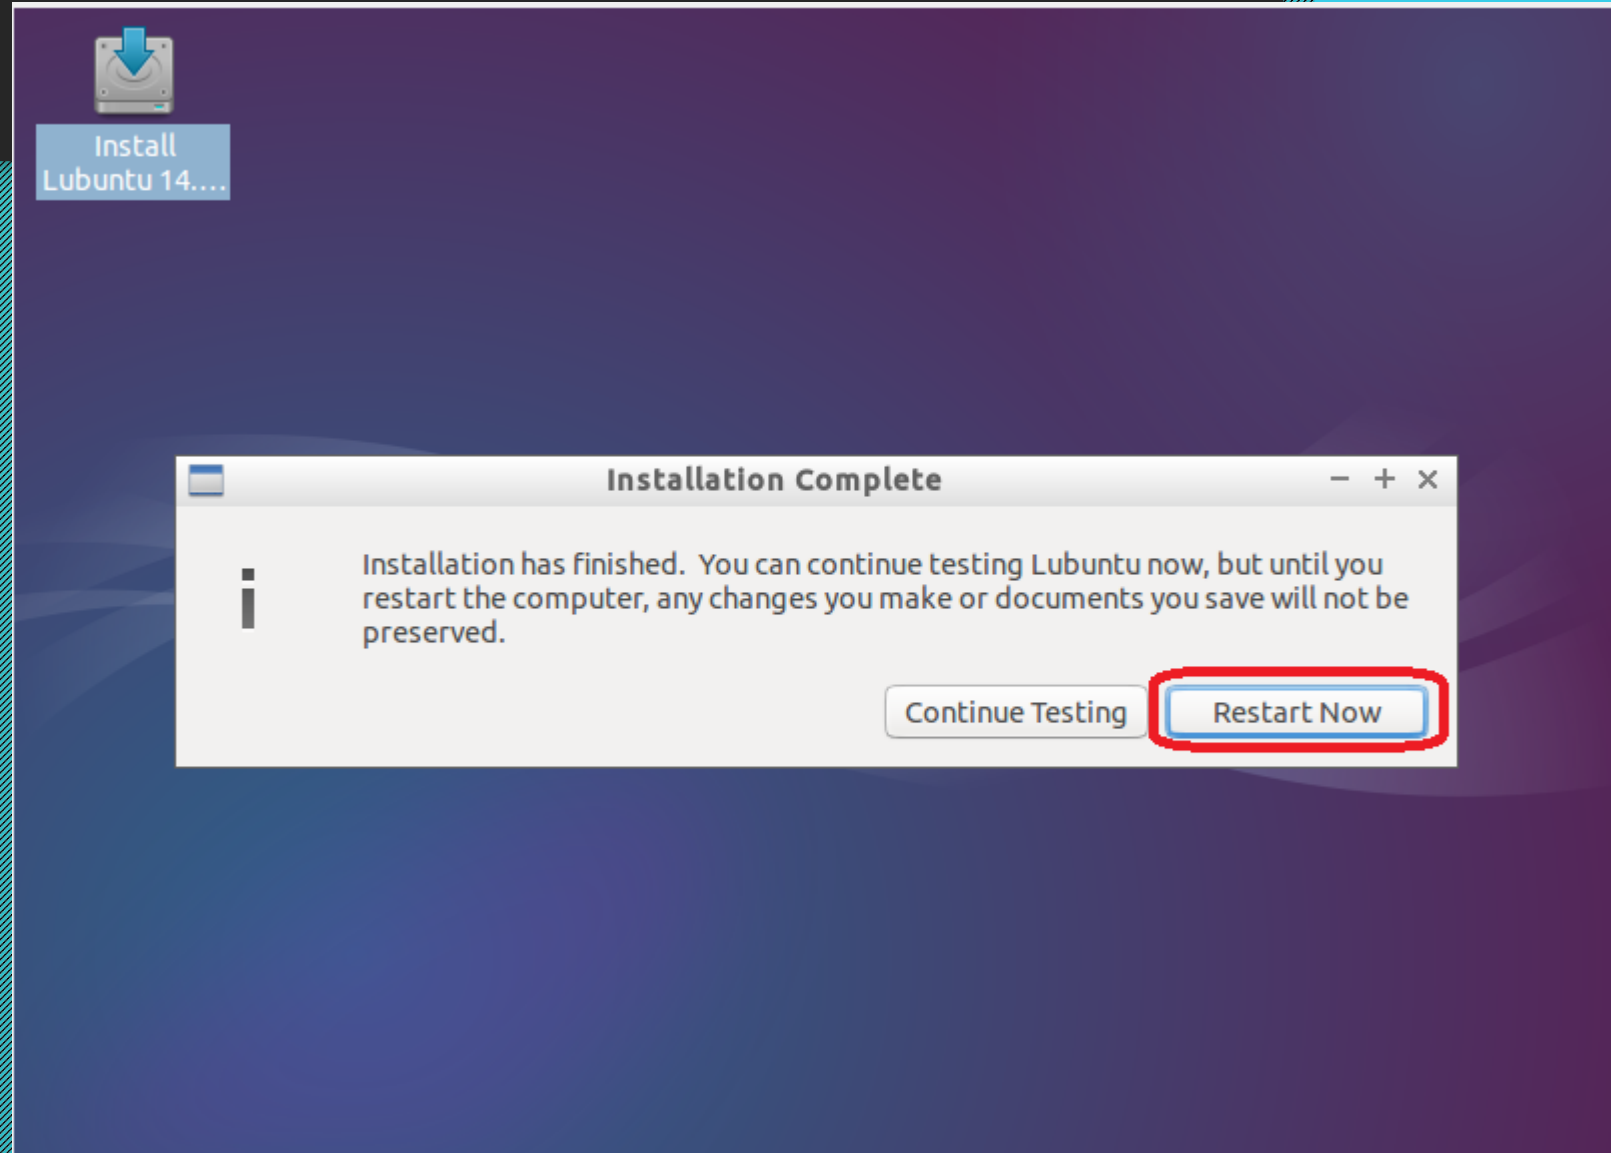

< Back Continue

Installing Lubuntu using VirtualBox

4. Install Lubuntu on virtual machine
 - Wait until the installation is complete

Installing Ubuntu using VirtualBox

4. Install Ubuntu on virtual machine

Installing Ubuntu using VirtualBox

4. Install Ubuntu on virtual machine

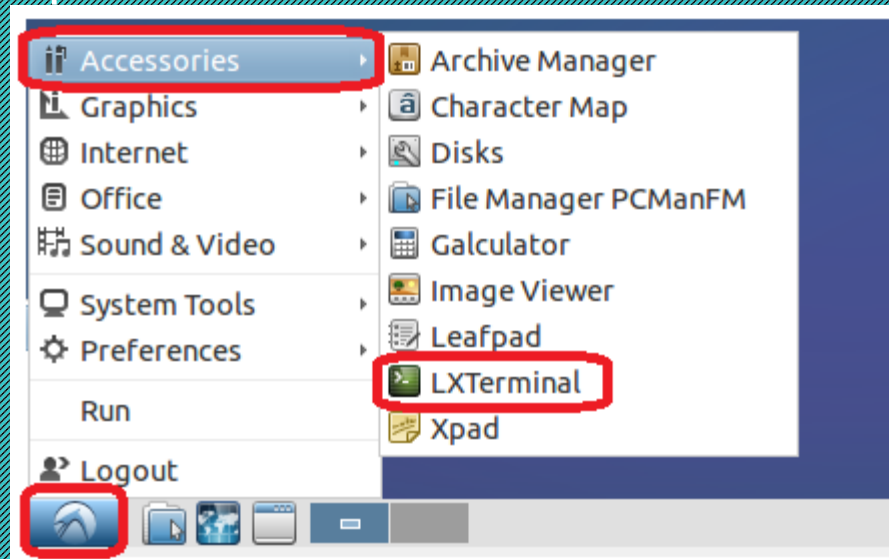

Installing Lubuntu using VirtualBox

5. Install required software for the course:

- manpages-dev
- g++
- patch
- strace
- ltrace
- linux-headers-\$(uname -r)
- linux-source
- kernel-package
- fakeroot
- libncurses5-dev
- libfuse-dev

Installing Lubuntu using VirtualBox

5. Install required software for the course:
- Open terminal

Installing Lubuntu using VirtualBox

5. Install required software for the course:

- Update package lists
 - `sudo apt-get update`
- Install required packages
 - `sudo apt-get install manpages-dev g++ patch strace ltrace linux-headers-$(uname -r) linux-source kernel-package fakeroot libncurses5-dev libfuse-dev virtualbox-guest-x11`
- Install a code editor
 - `sudo apt-get install geany`

Installing VirtualBox Guest Additions

- Guest additions are necessary to be able to share files between your host operating system and virtual operating

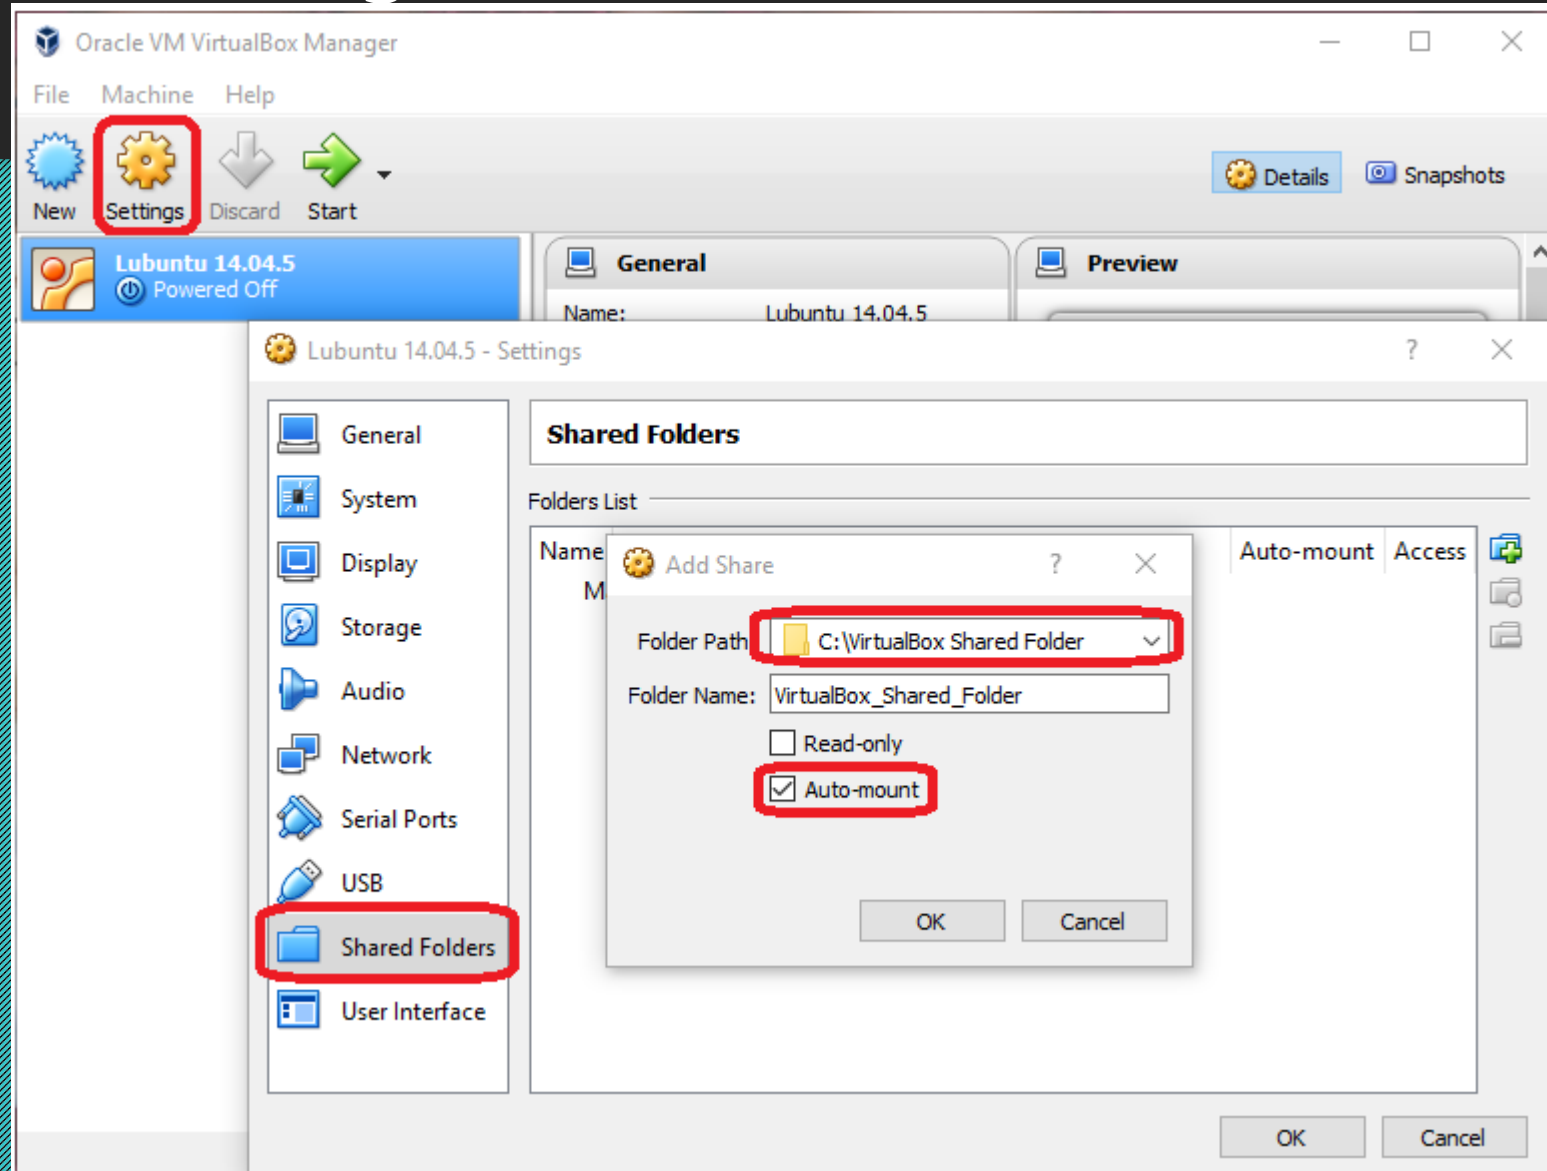

Installing VirtualBox Guest Additions

```
itucs@itucs-VirtualBox: /media/itucs/VBOXADDITIONS_5.1.26_117224
File Edit Tabs Help
itucs@itucs-VirtualBox:~$ cd /media/itucs/VBOXADDITIONS_5.1.26_117224/
itucs@itucs-VirtualBox:/media/itucs/VBOXADDITIONS_5.1.26_117224$ sudo sh ./VBoxLinuxAdditions.run
[sudo] password for itucs:
Verifying archive integrity... All good.
Uncompressing VirtualBox 5.1.26 Guest Additions for Linux.....
VirtualBox Guest Additions installer
Copying additional installer modules ...
Installing additional modules ...
vboxadd.sh: Starting the VirtualBox Guest Additions.

You may need to restart the Window System (or just restart the guest system)
to enable the Guest Additions.

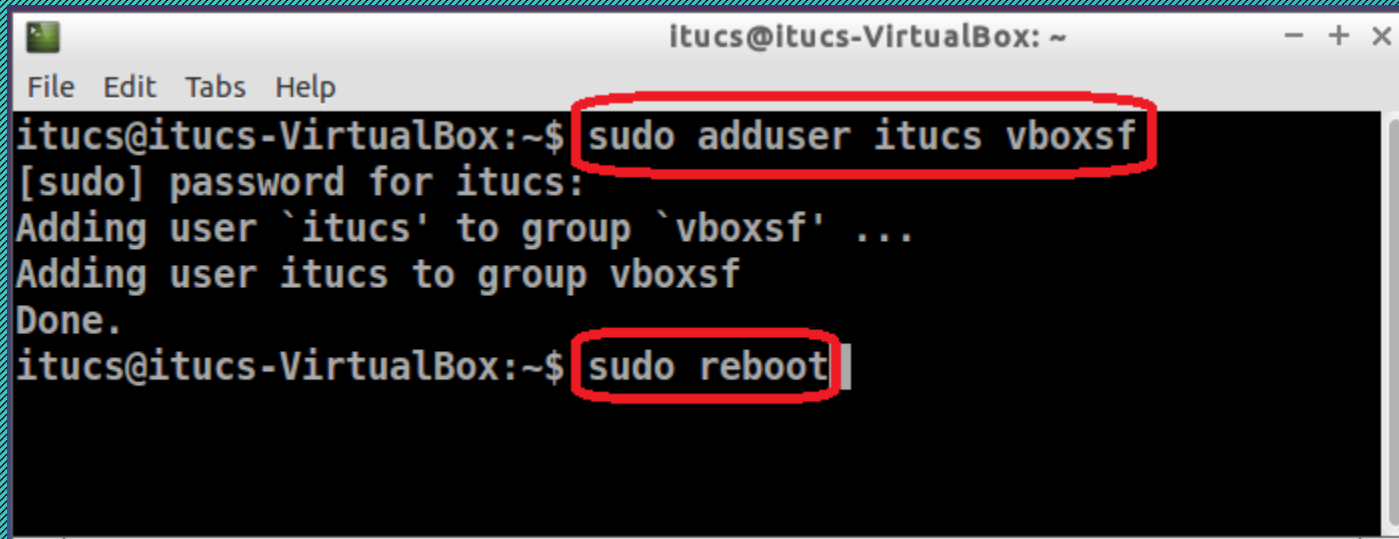

itucs@itucs-VirtualBox:/media/itucs/VBOXADDITIONS_5.1.26_117224$ sudo reboot
```

Creating a Shared Folder

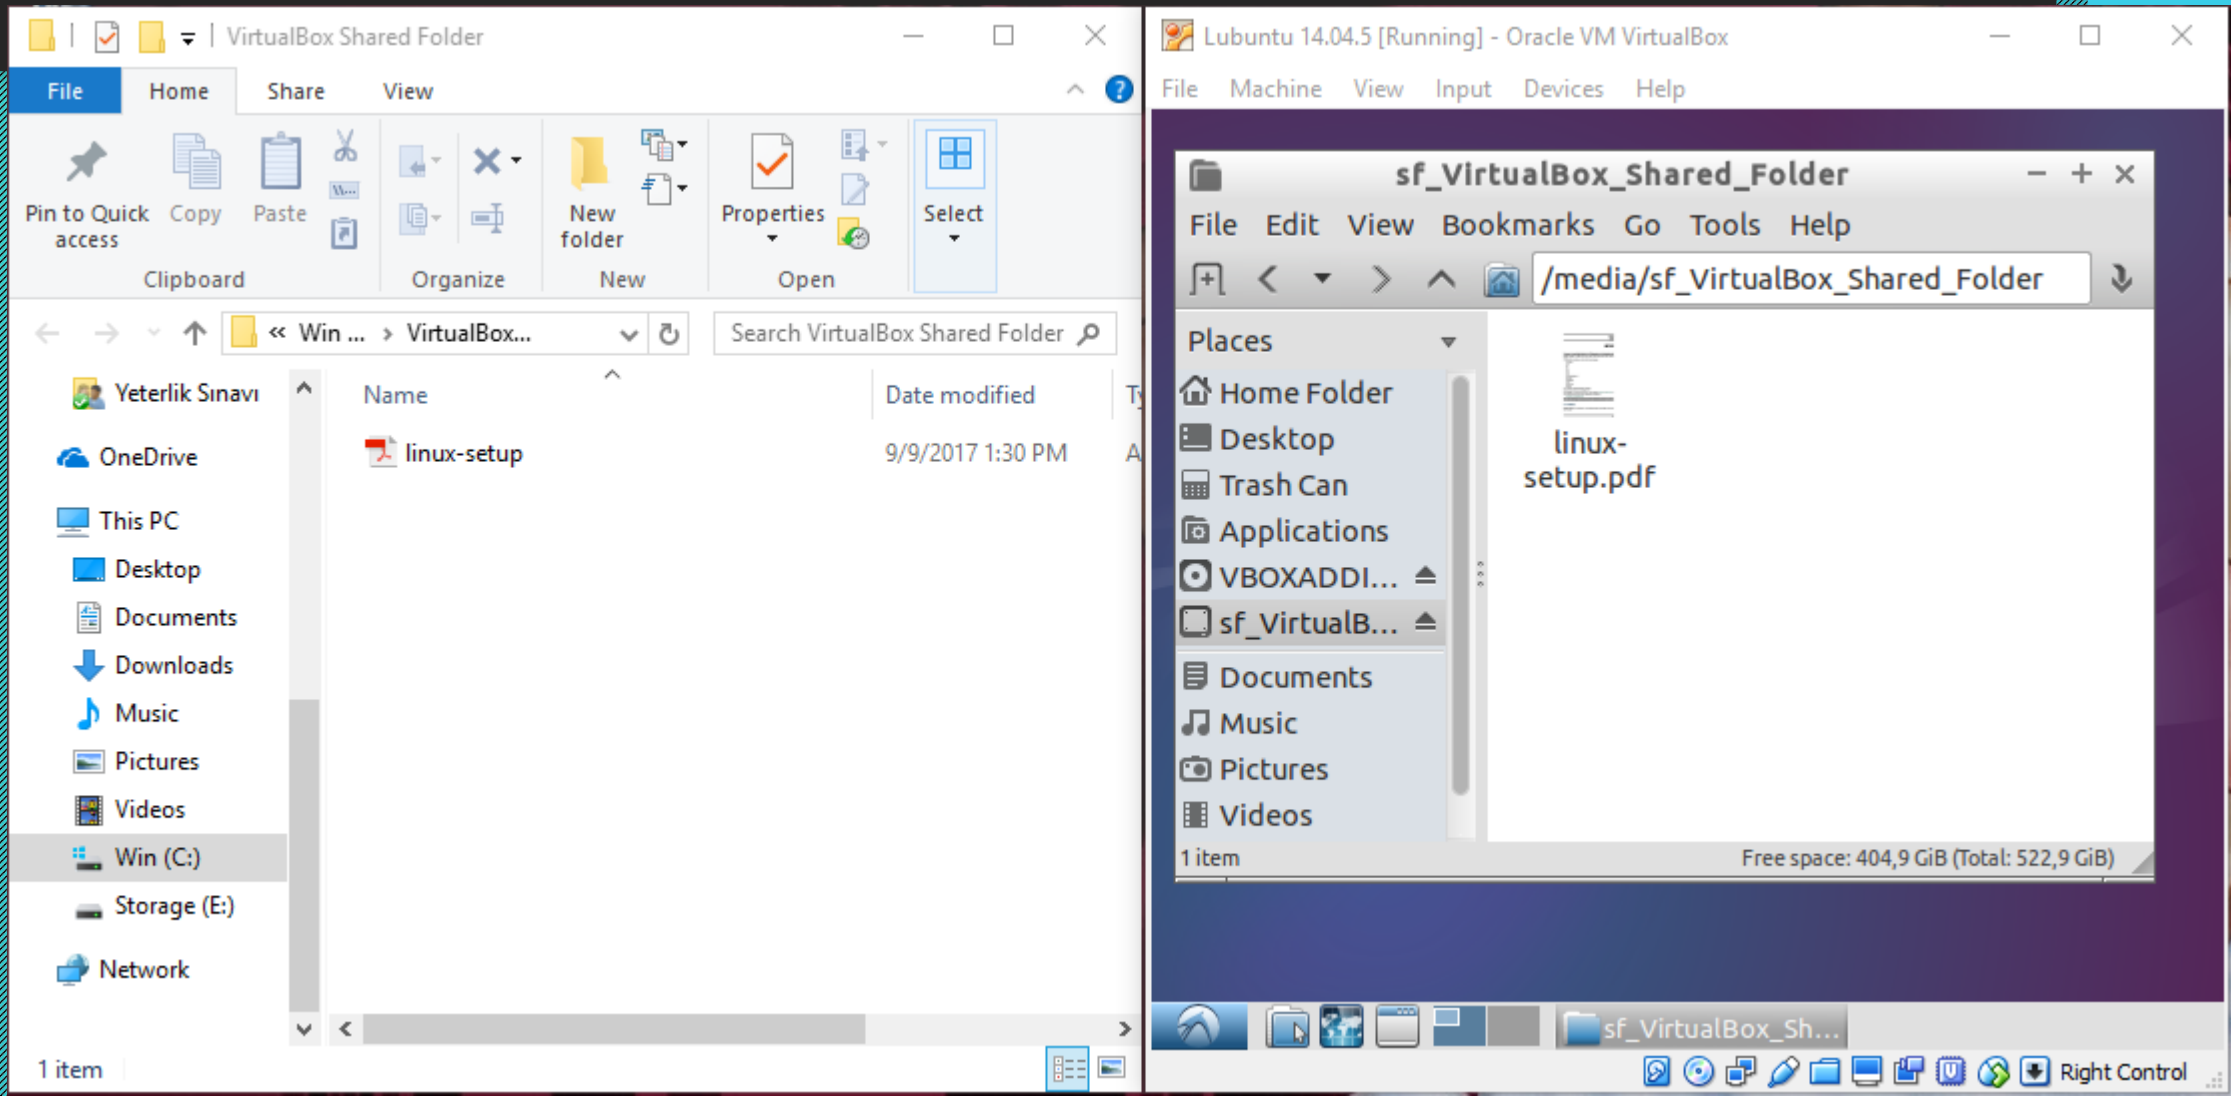

Creating a Shared Folder

- Add your user to VirtualBox shared folder group for giving

```
itucs@itucs-VirtualBox: ~  
File Edit Tabs Help  
itucs@itucs-VirtualBox:~$ sudo adduser itucs vboxsf  
[sudo] password for itucs:  
Adding user `itucs' to group `vboxsf' ...  
Adding user itucs to group vboxsf  
Done.  
itucs@itucs-VirtualBox:~$ sudo reboot
```

Creating a Shared Folder

Sharing Clipboard Between Host OS and Virtual OS
